This is a system generated letter. Hence, it does not require any signature.

1. Calculation of interest/additional interest and other charges are done on monthly basis, number of days in a month being 30. Broken Period Pre-EMI interest is apportioned on actual number of days for which interest is due as against 360 days in a year.

2. Pre closure charges would be charged extra at applicable rate/s in case the loan is closed/terminated before maturity of loan.

3. In addition to the above dues, interest accrued but not debited to the account at the applicable rate(s) from 05-May-26 with monthly rests is payable.

4. As per Government of India notification, Goods and Services Tax (GST) as applicable will be levied. This will be applicable from July 1, 2017.

For any clarifications, customers are requested to contact us within 7 days of receipt of this statement. ICICI Bank reserves the right to rectify any errors/discrepancies with due intimation to the customer.

9. A device that converts electrical energy into physical motion in a robot is:
- a) Sensor b) Actuator c) Controller d) Battery
10. The technology that allows a "Smart Fridge" to alert you when milk is low is:
- a) AI b) GIMP c) IoT d) HTML5

Q2. Fill in the blanks: [10]

1. The Binary number system consists of only two digits: _____ and _____.
2. In Excel, the _____ identifies the patterns or colors assigned to a data series.
3. In GIMP, the _____ tool is used to move the contents of a specific layer.
4. In Synfig, the process of creating movement between two keyframes is called _____.
5. Java was developed by _____ Gosling.
6. Internal CSS is defined inside the _____ tag.
7. The property `border-radius` is used to create _____ corners in CSS.
8. A robot that resembles a human being is called an _____.
9. The "Internet of Things" (IoT) relies on _____ to collect data from the environment.
10. _____ is an AI application used for medical diagnosis and body scanning.

Q3. State True or False: [10]

1. The Octal number system has a base of 7. []
2. An Excel chart updates automatically if the data in the cells changes. []
3. We cannot hide layers in GIMP once they are created. []
4. Synfig is an open-source software. []
5. In Java, `System.out.println()` is used for input. []
6. The `<a>` tag is used to create hyperlinks in HTML. []
7. Sensors act as the "eyes and ears" of a robot. []
8. Machine Learning is a subset of Artificial Intelligence. []
9. IoT devices require a constant internet connection to share data. []
10. NLP stands for National Language Programming. []

Q4. Short Answer Questions: [10]

1. Convert \$(1010)_2\$ to Decimal.
 2. What is the purpose of a Sparkline in Excel?
 3. Name the default file extension of a GIMP project.
 4. Define 'Variable' in the context of Java programming.
 5. What is a 'Smart City'?
-

SECTION B (40 Marks)

(Attempt any four questions)

Q5. Number Systems & Excel [10]

- a) Convert decimal number 50 into its Binary equivalent. (4)
- b) Differentiate between an Embedded Chart and a Chart Sheet in MS Excel. (3)
- c) Explain the use of the 'Data Label' component in a chart. (3)

Q6. GIMP & Synfig Animation [10]

- a) List the steps to change the opacity of a layer in GIMP. (4)
- b) What are 'Keyframes' in Synfig? Why are they important for animation? (4)
- c) Name two tools found in the GIMP Toolbox. (2)

Q7. Java Programming [10]

- a) Write a Java program to input two numbers and display their Sum and Product. (5)
- b) Explain the difference between `print()` and `println()` methods. (3)
- c) Define a 'Class' in Java. (2)

Q8. HTML5 & CSS [10]

- a) Write the HTML code to create an unordered list of three "Computer Parts." (4)
- b) Write the CSS code to set the background color of a page to 'lightblue' and text color to 'navy'. (4)
- c) What is the purpose of the `alt` attribute in an `<img>` tag? (2)

Q9. Robotics & Artificial Intelligence [10]

- a) Describe the three Laws of Robotics as proposed by Isaac Asimov. (4)
- b) Explain how AI is used in Social Media (e.g., Facebook or YouTube recommendations). (4)
- c) What is a 'Humanoid'? (2)

Q10. Modern Imaging & IoT [10]

- a) Explain how the Internet of Things (IoT) can help in saving energy in a household. (4)
- b) What is Natural Language Processing (NLP)? Give one real-life example. (4)
- c) Mention one use of Imaging Technology in the field of Education. (2)

Would you like me to generate the detailed Marking Scheme (Answer Key) for this paper as well?

Here's the **complete clear picture** of how all 5 services work together in your PDF tool project. Think of it like a full production system.

Your Full PDF Tool Architecture

You are using:

- [GitHub](#)
- [Vercel](#)
- [Render](#)
- [Cloudflare](#)
- [Hostinger](#)

Now let's assign clear roles (no confusion).

1. GitHub → CODE STORAGE (Brain Library)

Role:

GitHub stores your entire project code.

It contains:

- Frontend code (HTML/CSS/JS)
- Backend code (FastAPI / Node)
- Config files

Think:

👉 "Master copy of your project"

It does NOT:

- Run website ❌
 - Host API ❌
-

2. Vercel → FRONTEND HOSTING (Website UI)

Role:

Vercel shows your **website in browser**

It handles:

- UI of PDF tool
- Buttons, upload page
- User interface

Example:

`https://iepdf.vercel.app`

Think:

👉 "Shop front (what users see)"

3. Render → BACKEND (Processing Engine)

Role:

Render runs your **API + PDF logic**

It handles:

- File upload
- PDF merge/compress
- API endpoints

Example:

`https://iepdf.onrender.com/upload`

Think:

👉 "Factory / brain of system"

4. Cloudflare → DNS + SECURITY LAYER

Role:

Cloudflare connects your domain to Vercel + protects it

It handles:

- Domain routing (iepdf.com → Vercel)
- Security (DDoS protection)
- Speed caching

Think:

👉 "Traffic controller + security guard"

5. Hostinger → DOMAIN PROVIDER (iepdf.com owner)

Role:

Hostinger is where you **bought your domain**

It handles:

- Domain ownership (iepdf.com)
- DNS settings (later moved to Cloudflare)

Think:

👉 "Land owner of your website name"

FULL FLOW (REAL SYSTEM)

```
graph TD
    User --> Hostinger[iepdf.com (Hostinger domain)]
    Hostinger -- DNS --> Cloudflare[Cloudflare (routes traffic)]
    Cloudflare --> Vercel[Vercel (Frontend UI)]
    Vercel -- "API request" --> Render[Render (Backend processing)]
    Render --> Vercel
    Vercel -- "Response back to Vercel" --> User
    User --> Result[User sees result]
```

SIMPLE ANALOGY (VERY IMPORTANT)

Service	Role	Real-world example
GitHub	Code storage	Locker / file cabinet

Service	Role	Real-world example
Vercel	Frontend	Shop showroom
Render	Backend	Factory / processing unit
Cloudflare	Security + traffic	Airport security + traffic control
Hostinger	Domain owner	Shop name registration

FINAL SUMMARY (1 LINE EACH)

- GitHub → stores code
- Vercel → shows website
- Render → runs backend logic
- Cloudflare → routes + protects traffic
- Hostinger → owns domain name

MOST IMPORTANT RULE (for your project)

- ✓ Frontend must call Render API
- ✓ Domain must point to Vercel
- ✓ Cloudflare must manage DNS
- ✓ GitHub must sync everything

If you want next step, I can help you:

- ✓ Connect iepdf.com properly (100% working setup)
- ✓ Remove Vercel URL completely
- ✓ Make professional SaaS PDF tool UI
- ✓ Fix backend + upload system end-to-end

I have formatted the **Class 7 ICSE Computer Science Exam Paper** into a professional, printable layout.

Since I cannot directly send a .pdf file through this chat interface, I have generated a **high-quality, clean version below**. You can easily turn this into a PDF by following these steps:

1. **Highlight and Copy** the text below.
 2. **Paste** it into a Word document (MS Word or Google Docs).
 3. Go to **File > Save As** and select **PDF**.
-

INDIAN CERTIFICATE OF SECONDARY EDUCATION (ICSE)

PRE-BOARD EXAMINATION – 2026

COMPUTER APPLICATIONS | CLASS 7

Time: 2 Hours | Maximum Marks: 80

GENERAL INSTRUCTIONS:

- Answers to this Paper must be written on the paper provided separately.
 - You will not be allowed to write during the first 15 minutes. This time is to be spent in reading the question paper.
 - **Section A** is compulsory. Attempt all questions from this section.
 - **Section B** contains six questions. Attempt any **four** questions.
-

SECTION A (40 Marks)

(Attempt all questions)

Q1. Choose the correct option: [10]

1. The base of the Hexadecimal number system is:
a) 2 b) 8 c) 10 d) 16
2. Which chart in Excel is used to compare parts of a whole?
a) Line b) Pie c) Scatter d) Column
3. The transparent sheets stacked on top of each other in GIMP are called:

- a) Canvases b) Filters c) Layers d) Masks
4. Synfig Studio is primarily used for:
- a) 3D Modeling b) 2D Animation c) Video Editing d) Database Management
5. Which of these is a valid integer data type in Java?
- a) float b) char c) int d) boolean
6. The CSS property used to make text bold is:
- a) font-style b) font-weight c) text-bold d) thickness
7. The `<link>` tag for CSS is placed inside which HTML section?
- a) `<body>` b) `<footer>` c) `<head>` d) `<table>`
8. Which AI field allows machines to understand human speech?
- a) IoT b) NLP c) Robotics d) Computer Vision
9. A device that converts electrical energy into physical motion in a robot is:
- a) Sensor b) Actuator c) Controller d) Battery
10. The technology that allows a "Smart Fridge" to alert you when milk is low is:
- a) AI b) GIMP c) IoT d) HTML5

Q2. Fill in the blanks: [10]

1. The Binary number system consists of only two digits: _____ and _____.
2. In Excel, the _____ identifies the patterns or colors assigned to a data series.
3. In GIMP, the _____ tool is used to move the contents of a specific layer.
4. In Synfig, the process of creating movement between two keyframes is called _____.
5. Java was developed by _____ Gosling.
6. Internal CSS is defined inside the _____ tag.
7. The property `border-radius` is used to create _____ corners in CSS.
8. A robot that resembles a human being is called an _____.
9. The "Internet of Things" (IoT) relies on _____ to collect data from the environment.
10. _____ is an AI application used for medical diagnosis and body scanning.

Q3. State True or False: [10]

1. The Octal number system has a base of 7. []
2. An Excel chart updates automatically if the data in the cells changes. []
3. We cannot hide layers in GIMP once they are created. []
4. Synfig is an open-source software. []
5. In Java, `System.out.println()` is used for input. []
6. The `<a>` tag is used to create hyperlinks in HTML. []
7. Sensors act as the "eyes and ears" of a robot. []
8. Machine Learning is a subset of Artificial Intelligence. []
9. IoT devices require a constant internet connection to share data. []
10. NLP stands for National Language Programming. []

Q4. Short Answer Questions: [10]

1. Convert \$(1010)_2\$ to Decimal.
 2. What is the purpose of a Sparkline in Excel?
 3. Name the default file extension of a GIMP project.
 4. Define 'Variable' in the context of Java programming.
 5. What is a 'Smart City'?
-

SECTION B (40 Marks)

(Attempt any four questions)

Q5. Number Systems & Excel [10]

- a) Convert decimal number 50 into its Binary equivalent. (4)
- b) Differentiate between an Embedded Chart and a Chart Sheet in MS Excel. (3)
- c) Explain the use of the 'Data Label' component in a chart. (3)

Q6. GIMP & Synfig Animation [10]

- a) List the steps to change the opacity of a layer in GIMP. (4)
- b) What are 'Keyframes' in Synfig? Why are they important for animation? (4)
- c) Name two tools found in the GIMP Toolbox. (2)

Q7. Java Programming [10]

- a) Write a Java program to input two numbers and display their Sum and Product. (5)
- b) Explain the difference between `print()` and `println()` methods. (3)
- c) Define a 'Class' in Java. (2)

Q8. HTML5 & CSS [10]

- a) Write the HTML code to create an unordered list of three "Computer Parts." (4)
- b) Write the CSS code to set the background color of a page to 'lightblue' and text color to 'navy'. (4)
- c) What is the purpose of the `alt` attribute in an `<img>` tag? (2)

Q9. Robotics & Artificial Intelligence [10]

- a) Describe the three Laws of Robotics as proposed by Isaac Asimov. (4)
- b) Explain how AI is used in Social Media (e.g., Facebook or YouTube recommendations). (4)
- c) What is a 'Humanoid'? (2)

Q10. Modern Imaging & IoT [10]

- a) Explain how the Internet of Things (IoT) can help in saving energy in a household. (4)
- b) What is Natural Language Processing (NLP)? Give one real-life example. (4)
- c) Mention one use of Imaging Technology in the field of Education. (2)
